Remote Commander
RMT-P1BT

Identifying the parts

1. Indicator
   Indicates the camera's operational state in accordance with the Remote Commander operation.

2. Focus/Zoom button
   Adjusts the camera focus or zooms in/out the camera. Slide the Remote Commander's ZOOM/FOCUS switch to the position suitable for your purpose. For details, see Adjusting the camera focus or Zooming the camera.

3. Shutter-release/REC button
   Shoots a still image or starts recording a video with the camera. Slide the Remote Commander's MOVIE/STILL switch to the position suitable for your purpose. For details, see Shooting a still image or Shooting a video.

4. AF-ON button*

5. C1 button*

6. Strap holder

7. ZOOM/FOCUS switch

8. MOVIE/STILL switch

9. LOCK switch

10. a/b Battery cover

11. Battery cover locking latch

12. Battery cover turning knob

* Activates the function assigned to the C1 or AF-ON button on the camera. For details about the camera's settings, refer to the operating instructions supplied with your camera.

About the built-in Bluetooth® antenna

The Remote Commander is equipped with a built-in Bluetooth antenna at the section shown in the following illustration. When you operate the Remote Commander, keep your hand away from the section to prevent a possible Bluetooth connection failure.

Unpacking

If you find anything missing, please contact your dealer.
The number in the parentheses indicates the quantity.

- Remote Commander (1)
- Lithium coin cell battery (CR2032) (1)
- Set of printed documentation

4-748-144-12(2) Copyright 2019 Sony Corporation

Remote Commander
RMT-P1BT

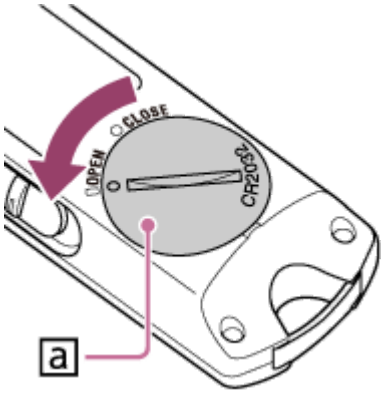
Inserting the battery

Insert the supplied lithium coin cell battery (CR2032) into the battery chamber of the Remote Commander.

1. **Turn the battery cover on the back of the Remote Commander toward “OPEN.”**

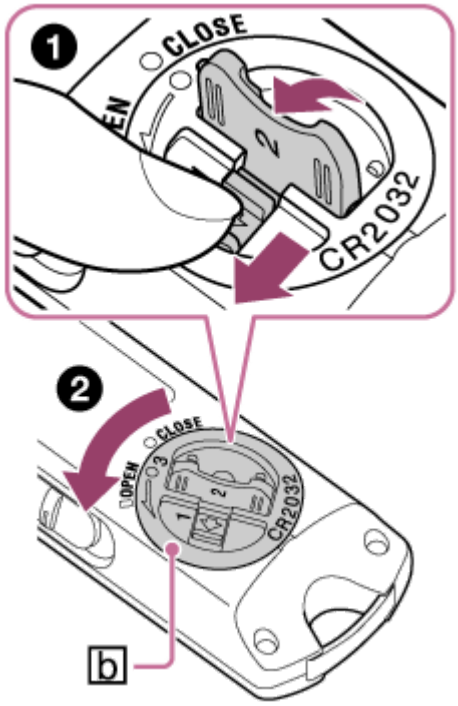
To turn the [a] battery cover:

- Put a coin, or a similar object, into the groove of the battery cover, and then turn the battery cover.



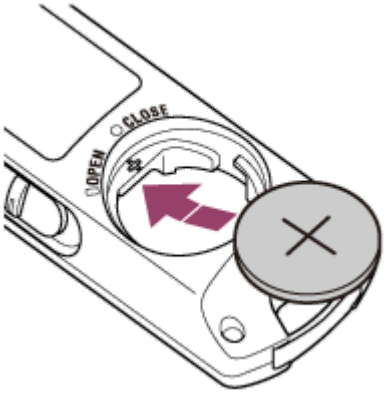
To turn the [b] battery cover:

- Slide the battery cover locking latch in the direction of the arrow to raise the battery cover turning knob (❶), and then turn the battery cover turning knob (❷).



2. **Remove the battery cover and insert the supplied lithium coin cell battery.**

Insert the battery so that the + terminal is facing upward.
(+ on the battery chamber indicates the direction of the battery.)



3 **Turn the battery cover until you reach “CLOSE.”**

Pairing the Remote Commander with the camera

Connect the Remote Commander and a camera with the Bluetooth function.
Before connecting the Remote Commander and a camera with the Bluetooth function, you must pair them together (device registration).
Before you start, check that the Remote Commander’s LOCK switch is in the position to the opposite of “LOCK.”

Note

- For notes on camera operation via the Bluetooth connection, refer to the Help Guide of your camera.

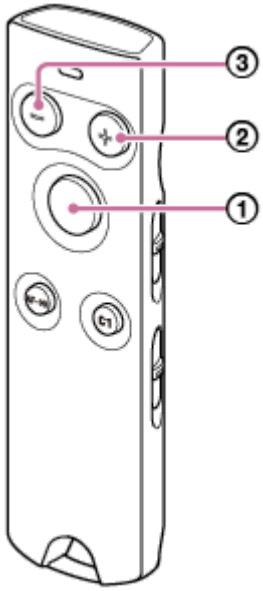
1. On the camera, select MENU → (network) → [Bluetooth] or [Bluetooth Settings] → [Bluetooth Function] → [On].
   If the pairing screen appears on the camera's screen, proceed to step 4.

2. On the camera, select MENU → (network) → ([Bluetooth]) → [Bluetooth Rmt Ctrl] → [On].*
   If the pairing screen appears on the camera's screen, proceed to step 4.

   * Depending on your camera, the following menu may appear instead.
   MENU → (network) → [Transfer/Remote] → [Bluetooth Rmt Ctrl] → [On]

3. On the camera, select MENU → (network) → [Bluetooth] or [Bluetooth Settings] → [Pairing] to display the pairing screen.

4. On the Remote Commander, press and hold the Shutter-release/REC button (①) and the Focus/Zoom button (either the + button (②) or the - button (③)) at the same time for at least 7 seconds.



5. When a confirmation message appears on the camera's screen, select [OK].
   When pairing is complete, [Paired.] appears.

If the remote commander is not operated for a certain period while the Bluetooth connection is active, / (no Bluetooth connection) may appear on the camera’s screen. In this case, operating the remote commander will automatically re-establish the Bluetooth connection.

Icons displayed on the camera screen

/ (Bluetooth connection available): The Bluetooth connection between this unit and the camera has been established.
/ (Bluetooth connection unavailable): The Bluetooth connection between this unit and the camera is not established.
(remote commander mark): You can operate the camera using this unit.

Note

- If pairing fails, the Remote Commander's indicator flashes rapidly. If this happens, start again from step 3. A pairing attempt times out when a certain amount of time elapses between the actions in step 4 and step 5.
- In the following situations, pair the Remote Commander and the camera again.
  - When using the Remote Commander to operate a different camera (After having connected the Remote Commander with a different camera, you also must pair the Remote Commander and the original camera again when connecting to the original camera.)
  - When the camera's network settings have been reset
- Depending on the camera you are using, the following functions cannot be used when [Bluetooth Rmt Ctrl] is set to [On]. If you want to use the following functions after using this unit, set [Bluetooth Rmt Ctrl] to [Off]. For information about the camera's functions, refer to the Help Guide for your camera.
  - Power-saving mode
  - Infrared remote commander

Notes on use

- When using this unit in an aircraft or a hospital, follow the instructions from the airline company or the hospital to avoid possible interference with instruments or medical devices caused by radio waves from this unit.

Do not use/store the unit in the following places

Storing under direct sunlight or near a heater
The unit may become discolored or deformed, and this may cause a malfunction.

Notes on the battery

- Make sure that the battery is worn out before disposal. To dispose of the battery, insulate the battery contacts with an adhesive strip.
  If the battery fluid leaks, wipe away any fluid on the battery chamber before inserting a new battery.
  If the battery fluid comes in contact with your body or clothing, thoroughly rinse it away with water.

- Depending on the length of the post production period, even a new battery may have a shorter life.
