## Unpacking

---

If you find anything missing, please contact your dealer.  
The number in the parentheses indicates the quantity.

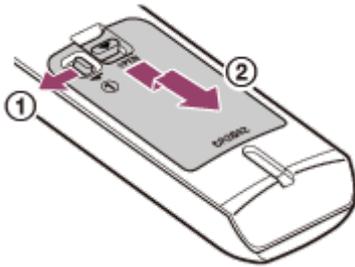

- Shooting Grip With Wireless Remote Commander (1)
- Lithium coin cell battery (CR2032) (1)
- Pouch (1)
- Set of printed documentation

Shooting Grip With Wireless Remote Commander  
GP-VPT2BT

## Inserting the battery

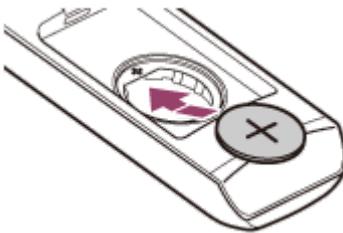

Insert the supplied lithium coin cell battery (CR2032) into the battery chamber of this unit.

- 1 Push the tab (①) on the battery chamber lid to the left and hold the tab, push down the other tab (②) on the lid, and then remove the battery chamber lid.**

- 2 Insert the supplied lithium coin cell battery.**

Insert the battery so that the + terminal is facing upward.  
(+ on the battery chamber indicates the direction of the battery.)

- 3 Replace the battery chamber lid.**

### Pairing the unit with the mounted camera

Establish a Bluetooth connection between this unit and a camera.

Before establishing a Bluetooth connection, you must pair the unit with the camera (device registration).

#### Note

- The following is an example of the mounting procedure for Sony Interchangeable Lens Digital Cameras and Sony digital still cameras.
- Before you start pairing, make sure that the LOCK switch on this unit is NOT in the "LOCK" position.

#### Setting [Bluetooth Rmt Ctrl] to [On] on the camera

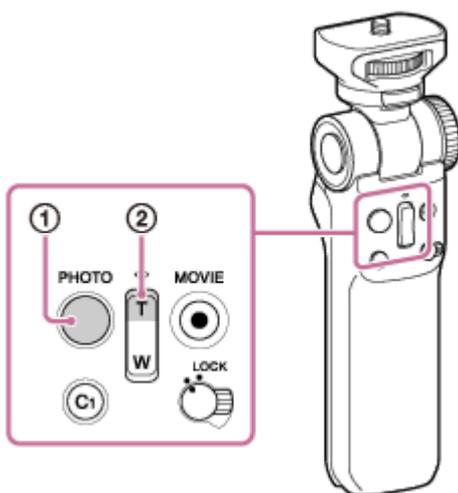

1. On the camera, select MENU →  (network) → [Bluetooth Settings] or [Bluetooth] → [Bluetooth Function] → [On].
2. On the camera, select MENU →  (network) → ([Transfer/Remote] →) [Bluetooth Rmt Ctrl] → [On].  
If the pairing screen appears on the camera's screen, proceed to "Pairing."

#### Pairing

#### Note

- On the camera, select MENU →  (network) → ([Transfer/Remote] →) [Bluetooth Rmt Ctrl] and make sure that [On] is selected.

1. On the camera, select MENU →  (network) → [Bluetooth Settings] or [Bluetooth] → [Pairing].
2. On this unit, press and hold the PHOTO button (①) and the T side of the Zoom button (②) simultaneously for at least 7 seconds.

3. When a confirmation message appears on the camera's screen, select [OK].  
 appears and pairing begins.  
When pairing is complete, [Paired.] appears.

#### Note

- If pairing fails, the indicator on this unit flashes rapidly. If this happens, repeat the procedure described in “Pairing” all over again. A pairing attempt times out when a certain amount of time elapses between the actions in step 2 and step 3.
- In the event of the following, pair this unit with the mounted camera all over again.
  - You mounted a different camera on this unit for operation. (When you replaced the camera back with the previously mounted one, you must pair the unit with the mounted camera all over again as well.)
  - You reset the camera's network settings.
- If this unit is kept unused while a Bluetooth connection is established,  (no Bluetooth connection) may appear on the camera's screen.

## Confirming the setting on the camera

---

On the camera, select MENU →  (network) → ([Transfer/Remote] →) [Bluetooth Rmt Ctrl] and make sure that [On] is selected.

### Note

- You cannot use the function for linking location information with a smartphone while [Bluetooth Rmt Ctrl] is set to [On].
- You cannot use an infrared remote commander while [Bluetooth Rmt Ctrl] is set to [On].
- While [Bluetooth Rmt Ctrl] is set to [On], the camera will not switch to the power-saving mode. Change the setting to [Off] when you are done using the Bluetooth remote commander.

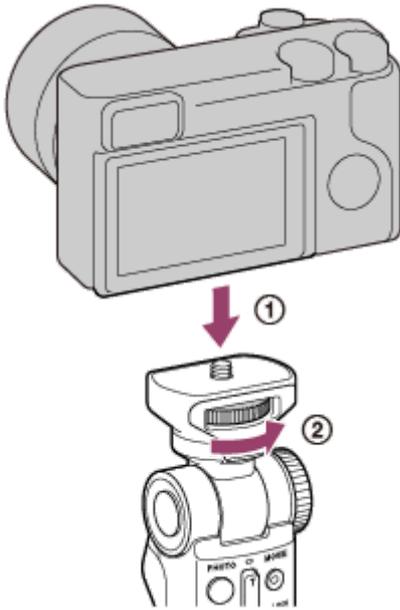

Shooting Grip With Wireless Remote Commander  
GP-VPT2BT

## Mounting the camera

Mount a camera to this unit.

Install the battery pack and a memory card in the camera before mounting to this unit.

- 1 Fit the camera mounting screw on this unit into the tripod screw hole on the bottom of the camera (①), and then turn the camera mounting wheel to secure the camera (②).

### Note

- Be careful not to drop the camera or this unit.
- When you are finished with using this unit, remove it from the camera and keep it in the supplied pouch. Before removing the unit from the camera, turn the LOCK switch to the "LOCK" position.

Shooting Grip With Wireless Remote Commander  
GP-VPT2BT

## Adjusting the tilt angle

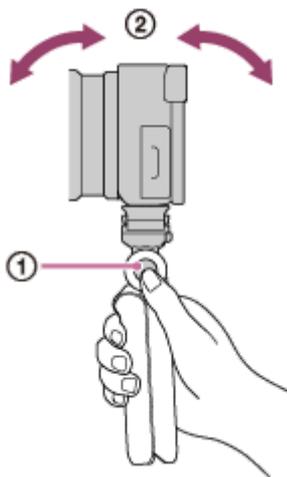

Adjust the tilt angle of the grip or the facing direction of the camera mounted on this unit.

### To adjust the tilt angle of the grip

By pressing the angle adjusting button, you can change the tilt angle of the grip by 10 degrees.

- 1 Press and hold the angle adjusting button (①) and release the button when the grip is adjusted to the desired angle (②).

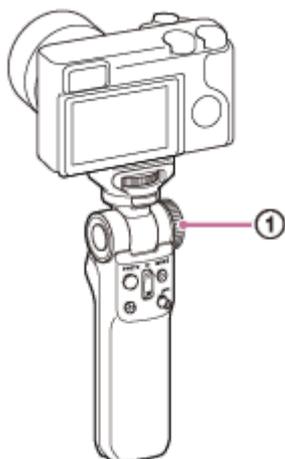

Before you press the angle adjusting button, be sure to hold the camera with your hand in case it tilts all at once. Do not change the angle of the grip by force without pressing the angle adjusting button.

- 2 Make sure that the angle adjusting button rises back into position to indicate that the grip is locked at the desired angle.

### To adjust feel for changing the angle of the grip

Turn the adjustment wheel (①).

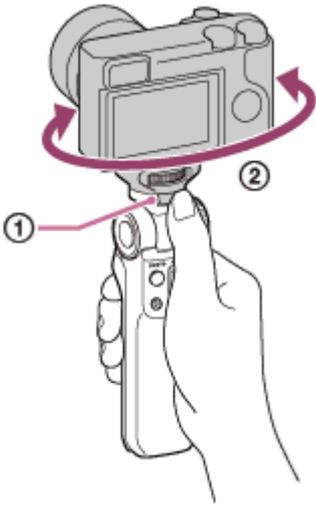

#### Hint

- If the camera mounted on this unit is heavy, the camera may tilt all at once while you are adjusting the tilt angle of the grip by pressing the angle adjusting button. To avoid this, it is recommended that you tighten the adjustment wheel (by turning it clockwise).  
If the camera is light, on the other hand, it is easier to adjust the tilt angle of the grip when the adjustment wheel is loose.
- Do not tighten the adjustment wheel excessively.
- When the adjustment wheel is excessively tightened, you can use a coin or an equivalent to loosen the wheel.

### To change the facing direction of the camera

By pressing the flip button (①), you can flip around the camera (②). Each time you press the button, the camera flips by 90 degrees.

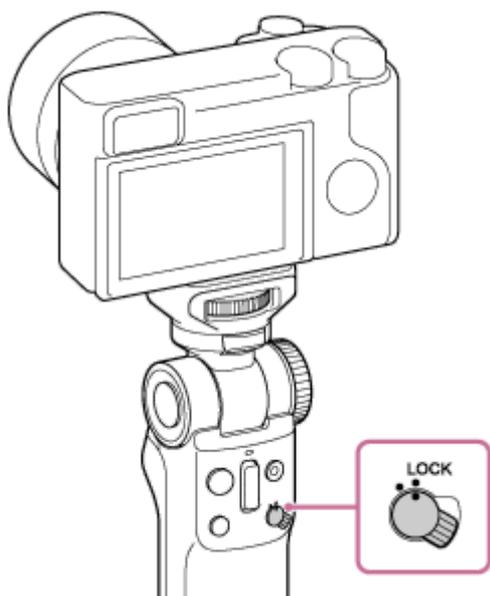

#### Note

- Make sure that the angle adjusting button has risen back into position. If not, the grip is not locked. Hold the camera and change the angle by moving the grip until the angle adjusting button rises back into position.
- Depending on the tilt angle of the grip, the remote commander function of this unit does not work. In such a case, readjust the tilt angle of the grip.

## Preventing unintentional operations

You can disable the remote commander function of this unit to prevent unintentional camera operations that may occur while you are carrying around the unit along with the mounted camera.

- 1 Turn the LOCK switch to the “LOCK” position.

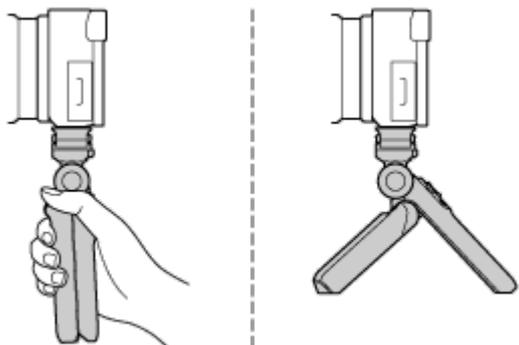

To enable the remote commander function, turn the LOCK switch away from the “LOCK” position.

GP-VPT2BT

## About the camera shooting styles

---

For camera shooting, grasp this unit with your hand or use it as a tripod by opening the legs of the unit.

## Shooting Grip With Wireless Remote Commander GP-VPT2BT

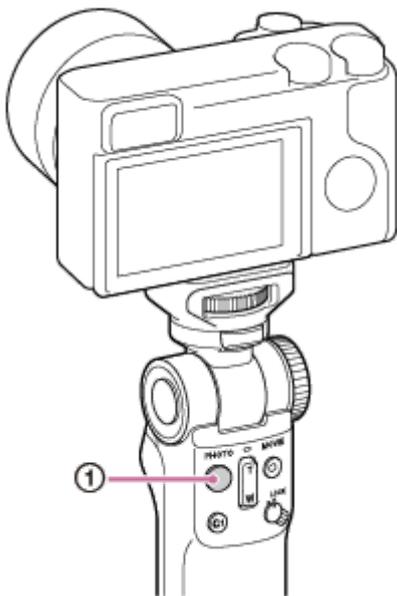

### Shooting a still image

---

Operate this unit that has a Bluetooth connection with a camera to shoot a still image.

#### 1 Press the PHOTO button (①).

Press the button halfway down to focus, and then press it all the way down to shoot.  
When the camera comes into focus by the auto focus function, the indicator on this unit turns on.  
When shooting is successful, the indicator turns on.

### Zooming the camera

---

Operate this unit that has a Bluetooth connection with a camera to zoom in/out the camera.

#### 1 Press the zoom button (①).

Press the T (Telephoto) end of the button to zoom in on a subject.  
Press the W (Wide-angle) end of the button to zoom out on a subject.

By pressing and holding either end of the zoom button, you can zoom in/out on a subject faster.

#### Note

- The zoom speed varies depending on the camera or lens.
- The zoom function works with a camera or lens featuring a built-in electronic power zoom. If the digital zoom function of the camera is turned on, digital zooming will be performed.

### Notes on use

---

- If the weight of the mounted camera exceeds the maximum weight limit of this unit (total weight of the mounted camera and accessories), the unit may fall over, resulting in damage.
- Be sure to mount your camera securely to this unit. When you hold the unit for camera shooting, be sure to grasp it firmly as well.  
Failure to do so may cause dropping of the camera or unit, resulting in an accident or injury.
- Do not swing this unit around while a camera is mounted on it.
- Depending on the camera mounted on this unit, the camera's screen may bump into the grip head and stop while you are opening the screen. In such a case, do not attempt to further open the screen by force.
- Before you adjust the tilt angle of the grip or the facing direction of the camera mounted on this unit, be sure to hold the camera or its lens with your hand.
- When opening/closing the legs of this unit or adjusting the grip angle, keep your finger(s) out of the way to avoid the risk of being caught.
- When using this unit as a tripod, spread its legs to full extent and place the unit on a flat surface. Depending on the tilt angle of the grip head or the mounted camera, the unit may lose its balance and wobble. Do not use the unit if it wobbles.
- When you have attached an accessory to your camera and mounted the camera to this unit, check if the unit still stays in balance.  
Depending on the attached accessory, the camera may not fit for use with the unit.
- Do not use this unit in a place subject to blowing wind or vibration to avoid the risk of falling over.
- When using this unit in an aircraft or a hospital, follow the instructions from the airline company or the hospital to avoid possible interference with instruments or medical devices caused by radio waves from this unit.

### Do not use/store the unit in the following places

Storing under direct sunlight or near a heater

The unit may become discolored or deformed, and this may cause a malfunction.

### Notes on the battery

- Make sure that the battery is worn out before disposal. To dispose of the battery, insulate the battery contacts with an adhesive strip.  
If the battery fluid leaks, wipe away any fluid on the battery chamber before inserting a new battery.  
If the battery fluid comes in contact with your body or clothing, thoroughly rinse it away with water.
- Depending on the length of the post production period, even a new battery may have a shorter life.
